

Dinesh C. Patel

Greater Atlanta, GA

404-513-6072

www.linkedin.com/in/dinesh-patel-gets-job-done <http://dcp1.github.io>

JavaScript Developer

Robust JavaScript Web Developer who has leveraged competencies and skilled gained by transforming engineering products from “ideation” to “commercialization” through prototyping, quality analysis, and the exploration and application of new technologies for design optimization.

Skills:

HTML, CSS: Bootstrap, W3.CSS, Semantic UI, JavaScript: jQuery, Node.js, NPM, Express, REST API, RESTful Routing, Git /GitHub, HEROKU, MongoDB, Sublime Text 3, Cloud9

Competencies:

Collaboration, Project Management, Process Improvements, Problem Analysis, Six Sigma

Highlights: (www.dineshpatel.ga, www.dcp1.github.io)

- Designed and developed a website for a shipping business, Easymail, to help customers track UPS and FedEx shipments.
- Increased market penetration by applying Search Engine Optimization (SEO).
- Applied jQuery to build an amazing RGB-color game.
- Built applications with Node.js on Express.js framework.
- Developed Node.js application with RESTful API and deployed on Heroku and GitHub.
- Experienced to apply CSS frameworks like Semantic UI, W3.CSS, and Bootstrap. □ Accomplished DOM and CSS manipulation through JQuery.
- Converted “Proof-of-Concept” ideas into functional and operational systems.
- Proven skills to establish methodologies and processes to perform lifecycle tests to verify, validate, and establish various criteria for given components and systems.
- Experienced to present technical information to technical and non-technical audience.
- Excellent ability to apply analytical, diagnostic, and problem solving skills in fast-paced and crossfunctional team.

Professional Experience:

The Coca-Cola Company, Atlanta, GA

1993-2018

Systems Design Engineer

Principal Engineering Technician

Engineering Technician

Collaboration

- Identified critical technical challenges involving product sold-out, calibration, beverage quality, reliability of components, and integration of software.
- Helped build a team of SMEs to address those key technical challenges. Result: Rapid progression of project from ‘Ideation’ to a ‘Field Test’.

- Defined software, mechanical, and beverage quality-criteria, developed and wrote SOPs to evaluate those criteria.

Result: Successful and timely product-launch.

Process Improvements and Procedures

- Developed and performed various performance evaluation tests to understand dispensability and beverage quality.

Result: Enabled commercialization of Freestyle dispenser with about 50,000 plus units.

Problem Analysis

- Designed test-configurations composed of controls, sensors, and instruments to perform various reliability tests.

Result: Successful executions of various R & D projects through years.

RDCP, INC., Atlanta, Georgia

2008 – 2014

Entrepreneur/Operator

- Designed and developed a website for a shipping business, Easymail, to help customers track UPS and FedEx shipments.
- Increased cash-flow by 100% in 5 years by introducing new products and services, cost reduction, payroll management, and re-negotiating various leases and contracts.

Result: Increased market penetration by applying Search Engine Optimization (SEO).

Education:

Southern College of Technology, Atlanta, GA

Bachelor of Science, Mechanical Engineering Technology

Training:

Six Sigma Green Belt

Project Management Training

The Web Developer Bootcamp
